AWS Fundamentals Certification

Network certifications (cisco)

Happiness in Leadership: Driving Team Success

Project Management Professional (PMP)

Certification APMG Change Management

Ahmed Aoun

pre-engineer student || DevOps & cloud | AWS | CI/CD , containers (docker , kubernet) ...

Gouvernorat Tunis, Tunisie

Résumé

Integrated preparatory cycle student, passionate about DevOps, Cloud computing, and the Internet of Things (IoT). I combine a solid command of languages (Python, C/C++, Java) and modern tools (Git, GitHub, GitLab, Bitbucket, Prompt Engineering / Vibe-coding) with skills in designing robust, secure, and scalable solutions.

My approach goes beyond technology: I value communication, teamwork, and active listening to unite around ambitious projects. Thanks to my academic and community experiences, I have developed skills in project management, leadership, strategic decision-making and problems solving+ competitif programming & In my free time, I remain curious about technological innovation and deepening my knowledge.

Committed to Tunisian civil society, I am convinced that technology is a lever for positive impact. I seek to take on new challenges and contribute to innovative projects that shape the future.

If you are interested in collaborative projects, exchange of ideas or innovation opportunities, do not hesitate to contact me +216 99152499 / ahmedaoun1@outlook.com . !

Expérience

Compagnie des Phosphates de Gafsa (CPG)
